SUMMARY

Business Intelligence and data professional with experience translating business needs into practical reporting, dashboard, and data-quality solutions. Skilled in Power BI, DAX, SQL, Excel, Power Query, Tableau, SSRS, and data validation, with a strong ability to gather requirements, define KPIs, support stakeholders, and improve reporting processes. Experienced in working across business and technical teams to design reliable BI solutions, promote user adoption, troubleshoot issues, and deliver insights that support better decision-making.

EXPERIENCE

Product Experience Consultant 09/2025 - Present
Memseer Windsor, ON

Software start-up company for a software application focusing on time management, scheduling and other productivity services.

- Create use case for the application, clarifying problems, creating expectations, testing and documentation.
- Implement **A/B** specs, perform troubleshooting and handle data entry tasks related to product setup. Help with any database issues (Mongo DB), backup scripts and automation using bash scripting.
- Supporting business users through leading and assisting in user acceptance testing of systems upgrades and enhancements including the creation of user diagrams, gap analysis on business rules and functional requirements.

Data Quality MDM Analyst 04/2022 - 04/2023
Ford Motor Credit Company Dearborn, MI

Part of a project to consolidate data flow from millions of records across Europe and North America for Ford Credit's lending system. Project creating standardization across the enterprise for golden record management, bench-marking, KPI (performance indicators), i.e. tracking of delinquent and duplicate accounts.

- Designed and implemented data mappings, pipelines, and integrated dashboards based on business requirements, improving data accessibility and enabling operational insights using Informatica MDM, Teradata, and GCP.
- Extracted, processed, and transformed large-scale datasets using data warehousing concepts, while developing SQL and Regex-based validation checks to ensure data accuracy, consistency, and reliability.
- Collaborated with business stakeholders to gather requirements and define data quality rules (completeness, validity, accuracy), supporting enterprise-wide data standardization and pipeline integration using Informatica MDM, Alteryx, IDQ, and Teradata.

STRENGTHS

■ Data Pipelines & Quality

GCP Data Flow, Informatica
MDM, Oracle SQL, Data
Wrangling/Regex, Teradata/Tera
SQL

■ Data Analysis & Visualization

Microsoft Power BI, Amazon
QuickSight, Python (Pandas,
NumPy, Seaborn, Plotly), Tableau

🏆 Effective Communicator

Ability to articulate economic
concepts to varied audiences for
better understanding

📄 Reporting

Able to handle multiple client
reporting needs

KEY ACHIEVEMENTS

🏆 Data Quality

Enhanced data accuracy by 30%
through data quality rules

💎 Novel Statistics

Built a new method to interpret
and report lump-sum payments
and other wage statistics

💎 Customer Service

Scaled reporting services from
five to eleven enterprise
customers within two years

EXPERIENCE

Data Analyst

11/2019 - 04/2022

Halight Inc

Tecumseh, ON

Learning Management Software company with 40 employees serving several Fortune 500 companies. Customer oriented role, supportive role serving eleven enterprise customers.

- Designed and built ad-hoc reports using Oracle SQL in DBeaver database, and developed interactive dashboards with MS SQL Server Reporting Services (SSRS), data visualizations with Amazon QuickSight, Power BI, and Tableau to deliver key business intelligence insights for various clients. Also performed other database-related tasks on an ad-hoc basis, updating records, tables, and stored procedures.
- Developed complex database queries for KPIs, sales metrics, customer retention and acquisition, and staff participation, while extracting, cleansing, and validating data to support in-depth analysis and informed strategic decisions.
- Ability to scale and work in a fast-paced environment. Dealt with six enterprise customers and scaled to eleven customers over three years. Dealing with tight deadlines and sensitive to detail.
- Part of database team, dealing with customer requests for reporting services using Jira for the ticketing and management of customer requests.

Housing Project

01/2019

Research Project

remote

Project studying the housing market in Washington State.

- Performed data cleansing, analysis summarizing descriptive and inferential statistical methods creating insights into house prices for Washington State. Using Sequel, R and Python over cross-sectional data.
- Project main method was generalized least-squares, stepwise and R-Square selection method for regressors, Mallows-cp, Pearson Correlation Coefficients, using VIF to detect collinearity among other statistical tools.

Labor Economist

09/2012 - 12/2018

Government of Ontario

Toronto, ON

Onboarded to **spearhead improvements in data collections** and reporting services for Collective Bargaining Information Services. As a product specialist, participated in the development, testing, data migration and deployment of a new business application. Role involved the gathering and prioritizing of business requirements, bridging gaps between business needs and solutions.

- Designed and improved the preparation of monthly, quarterly, and yearly publications for both policymakers and the general audience, adding new sections and insights on collective bargaining statistics and data.
- Conducted labor market analysis and built data models to assess trends, variances, and evaluate the impact of policy changes.
- Managed data lifecycle—including collection, entry, data wrangling (cleaning, standardization, validation)—to improve data integrity and usability. Conducted analysis and reporting, culminating in monthly, quarterly, and annual publications, as well as ad hoc reports and briefings for internal stakeholders and senior policymakers.
- Participated in the development, testing, and deployment of a new business application. Collaborated with the QA team to create test plans and test cases, including user acceptance testing (UAT), and investigated issues as needed.
- Analyzed and assessed functional requirements, and conducted gap analysis of business rules and system process flows while developing new reporting standards and data integrity checks, and ensuring the accuracy of migrated data through statistical report validation.
- Developed new methods for gathering, interpreting, and reporting lump sum and other collective agreement data, delivering actionable insights to government decision-makers.

EXPERIENCE

Business Consultant	04/2012 - 06/2012
Personnel by Pro-Staff	Windsor, ON
Defined a comprehensive business plan in terms of operations, human resources, marketing plan and financial performance analysis.
